SHEET DRAINS & GEOTEXTILES

TERRADRAIN

- TerraDrain® Sheet Drains offer a modern, cost effective alternative to conventional drainage systems.
- Conventional aggregate drainage systems are costly and difficult to install.
- They replace aggregate backfill in many drainage applications. Also to replace French/Pipe Drains
- Sheet Drains reduce hydrostatic pressure and convey ground water away from the structure.
- Protection board systems can often be enhanced or replaced by TerraDrain Sheet Drains.

TerraDrain TOTAL-DRAIN system

TERRATEX GEOTEXTILES

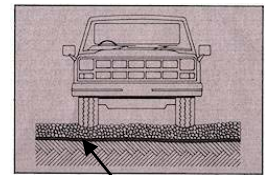

Benefits:

- 1) Faster construction in all weather conditions
- 2) Reduced aggregate requirements
- 3) Reduced excavation
- 4) Reduced long term maintenance

TerraTex applications are: Retaining Walls and Bridge Abutments, Floor Slabs, Silt and Barrier Fencing, Erosion Control, Foundation Walls, Soil reinforcement, Embankments, etc.

without geotextile

geotextile

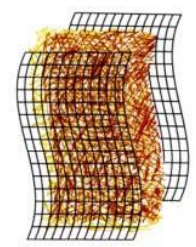

TerraCell Cellular Confinement System

TerraTex Geotextiles

TerraGrid Geogrids

TerraJute Erosion Control

TerraTex Geotextiles for Soil Stabilization are rugged woven fabrics used to stabilize very poor to moderate strength soils by separating subgrade and aggregate layers.
